Phil --

On behalf of the joint GWPC/IOGCC State O&G Regulatory Exchange initiative to facilitate the Induced Seismicity by Injection Work Group (ISIWG), I want to express appreciation for your willingness to serve as an advisory resource by sharing your knowledge with other stakeholders as we working together to develop tools to minimize risk, and enhance appropriate readiness when seismic events occur.

The gathering in Biloxi the afternoon of May 18<sup>th</sup> (1-5:00p) is the first opportunity for the state led work group to involve outside professional advisory stakeholders in discussions. We know the agenda is very full and ask that you be prepared to summarize the key elements for which the group will strive to understand your opinions and your initiatives related to this topic. We are developing a more detailed list of key questions that will soon be sent to you that we hope you can prepare prior to the event so we will have a head start understanding the various perspectives of participants.

Attached is the ***DRAFT preliminary agenda*** that includes the current ***list of participants*** and the ***DRAFT rules of participation***. We ask that you review these basic rules and agree to follow them as an invited professional advisor to the ISIWG.

Please do not distribute this information as this is a work in progress and may contain information the ISIWG is not ready to release.

Let me know if you have any questions and thank you for your participation.

Ben Grunewald
